

When Spring to Summer Falls

C **F**
When Spring to Summer Falls
C **G**
and all that's short grows tall
C **F**
Would you still be with me
C **G**
Or maybe not at all.
C **F**
When blue comes to ride the sky
C **G**
and green comes to trees.
C **F**
will you be by my side
C **G** **C**
or just in my lonely dreams.

Refrain....no lyrics ...Dm C. Dm. G

When Summer Falls to Winter
and the heat cools to color
what might bring us closer still
one longing for the other.
I have hope that these cold winds
will set loose your famous smile,
and bring us back to romance
with blankets around the fire.

Refrain

When Fall comes to Winter, and
Summer comes to both,
If all we bring can't live in Spring
then the Seasons are not the fault.
Trust we must to a simple fate

that comes from where we fall
running to our own escape
as we grow from short to tall.
